

Your eyes work hard. Neurolenses relieve the pain.

These painful symptoms are caused by today's increased demands on your near vision.

Headaches

Eye strain

Neck & shoulder pain

Dizziness

Dry eye

Light sensitivity

Neurolenses, with Contoured Prism, reduce painful symptoms and restore your naturally comfortable vision.

Only a Neurolens specialist practice can prescribe the pain-relieving comfort of Neurolenses.

Relief is in Sight

Ahhh for your eyes.™

Today's eyes work hard. In work and leisure, people are using their near vision more than ever, especially with digital devices.

Here's how Neurolenses work: our two eyes work in alignment to see one clear image. If there is a misalignment in your vision, it can cause headaches, eye strain, neck and shoulder pain, dry eye, dizziness, and light sensitivity. Neurolenses correct misalignment to restore clear, comfortable vision.

93%

of patients have responded positively to wearing Neurolenses.*

"Neurolenses helped solve all the problems that I didn't realize were connected to my eyesight."

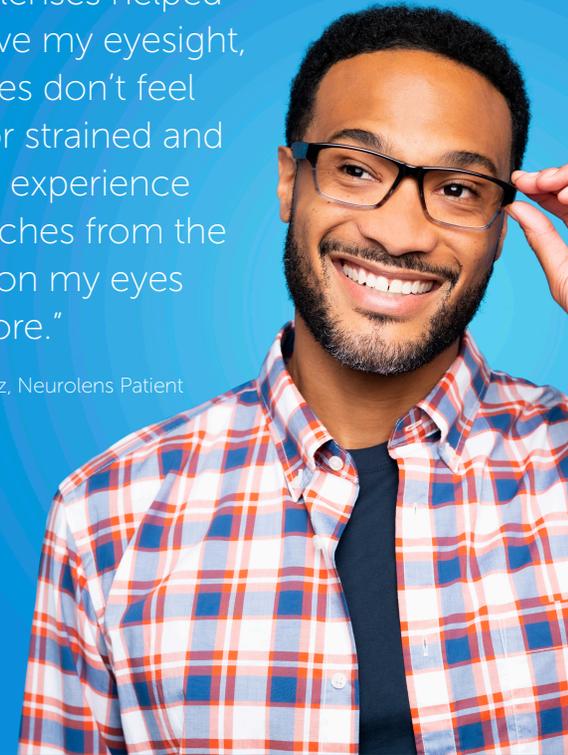

– Karen Hutchins, Neurolens Patient

Neurolenses can be customized for any patient, with any type of frame and any prescription – or even no prescription at all.

*Survey of 360 Neurolens patients after 45 days of treatment. Data on file, Neurolens, Inc.

"Neurolenses helped improve my eyesight, my eyes don't feel tired or strained and I don't experience headaches from the strain on my eyes anymore."

– Sam Lopez, Neurolens Patient

"I have noticed such a huge difference in the clarity and comfort of my vision. No other lens I have tried even compares!"

– April Lewis, Neurolens Patient
